

Assignment Title:

Test Case Design Assignment: Sort, Price Range, and Search Features

Target Website:

Students will write test cases for the Practice Software Testing – Toolshop website:

<https://practicesoftwaretesting.com/>

Allowed Test Case Format:

Students may use either:

1. the shared Excel test case template, or
2. the online tool: <https://moamina.github.io/Simple-Test-Case/>

Assignment Objective

The purpose of this assignment is to train students to design clear, structured, and professional test cases for web application features. Students must analyze the behavior of three features on the target website and write test cases that cover:

1. each feature individually
2. combinations between features
3. normal cases
4. boundary cases
5. negative cases
6. usability-oriented checks where relevant

The features to be tested are:

1. Sort (first 3 sort)
2. Price Range
3. Search

Try to Write Minimum Required Number of Test Cases

Submission Format : Students must submit one **Excel file** using the shared template

Evaluation Rubric

Completeness — 25% (> 22 TCs Excellent)

- Are all required features covered?
- Are combination scenarios included?

Quality of Test Case Design — 30%

- Are the test cases meaningful, correct, and well-structured?
 - Test cases are clear, well-structured, logical, and follow professional QA practices. Titles, steps, and expected results are precise.
(Excellent)

Positive, Negative, and Boundary Testing (20 marks)

- Test cases include strong coverage of normal, negative, and boundary scenarios.(Excellent)

Combination Testing (Sort + Price + Search) (20 marks)

- Multiple meaningful combinations tested, including complex interactions between features.(Excellent)

Bug Identification (5 marks) (at Lease one bug)
